CETIN Bulgaria EAD is a technological company which offers a wide range of wholesale services such as: telecommunication infrastructure ensuring mobile and fixed voice and data, internet connectivity, etc. We at CETIN build and maintain the crucial technological infrastructure, which allows our clients to offer new services and products via innovative technologies, stimulating development, change and improvement. Therefore, information security is among the top priorities for the company.

The main objective of management of the information security, according to ISO 27001, is to ensure the risk identification and management, the integrity and confidentiality of all assets and information of the company and of the clients and to ensure business continuity.

The top management ensures that:

- Context of the organization is defined and all external and internal issues concerning the management of information security resolved;
- Any changes in the context of the organization and all external and internal issues are taken into account;
- Information security risks are identified and controlled;
- Integrity of information is maintained;
- Availability of information on all processes is maintained;
- Information is protected from unauthorized access;
- Confidentiality of information is assured;
- Criteria for assessing the risks are defined as the level of acceptable risk to which assesses the likelihood of threats and the severity of their impact on the company's assets;
- The legal requirements and internal requirements of the company are implemented;
- Procedures and policies for implementation of the information security policy are developed;
- Needed resources for the information management system are available
- Training for all employees for management of the information security is provided;
- Information security awareness among employees is raised and maintained;
- All existing and potential breaches will be reported to the Management representative and will be thoroughly investigated;
- Business Continuity and Disaster Recovery plans are created, implemented and maintained;
- Continually improve the effectiveness of the implemented Information security management system, through a policy of continual improvement.

In order to fulfil these objectives, and to provide the level of control and traceability, necessary to demonstrate compliance with recognized processes, it is the policy of the organization to maintain an efficient and effective Information security management system (ISMS) based upon the requirements of the ISO 27001 Information security Management Systems Standard.

This Information Security Policy and the ISMS shall be reviewed and where necessary revised as a minimum during formal annual review to ensure that they are continually improved.

The Management representative and the managers are responsible for implementing and maintaining the ISMS policy and providing full support.
